

Donaldson Delivers

Hydraulic Oil Filter Element for John Deere 8000 Series Tractors

P580316

Outstanding in their field. Donaldson hydraulic oil filter elements are an important part of any efficient agricultural operation's maintenance program. Filter elements need to withstand the harsh demands of the field – dusty conditions, harsh weather conditions, the long hours and the strain of a heavy loads. Donaldson filters deliver the right combination of quality and value that help keep your equipment in the field and out of the shop.

Choose Donaldson and keep your operation running smoothly.

Tractors function in an filthy world. Everything in their environment is a threat to their continued functioning. Unexpected downtime can bring a farm operation to a halt, and that's not good. Our job is to do everything in our power to prevent that.

With so much is riding on filtration, it's important to choose filters you can trust to perform. Getting filters from one source is a big advantage, simplifying orders, delivery and installation. Donaldson offers filtration you can trust it to perform.

Fluid cleanliness is critical to protecting sensitive (and expensive) components. We've added a new filter for the John Deere 8000 series tractor applications. They are manufactured, tested and proven to perform under the most severe conditions.
