

Donaldson Delivers

Hydraulic Replacement Filter Elements

for Parker® 12CS & 50CS Series Filters

Donaldson delivers filtration solutions for your fleet.

You need effective filtration to keep your equipment in operation. Donaldson delivers filtration that can stand up to the starts, stops and harsh operational conditions, with the right combination of quality and value that reliably help keep your fleet moving until the next scheduled service.

Donaldson DT high performance synthetic media filters provide dependable protection and reliable quality. Manufactured, tested and proven to perform under the most severe conditions, they are designed to deliver the quality and value you expect.

Now available: Donaldson hydraulic replacement filter elements with full flow pleated design with glass fiber media provide dependable protection and reliable quality. With lower pressure drop and greater efficiency, they ensure cleaner fluid, longer filter life and better protection for your equipment.
