Hydraulic In-tank Return Filter Element

Parker® KLT/KLS Replacement Filter Element

We've got you covered.

Now available: Donaldson hydraulic in-tank return replacement filter elements with high performance synthetic media provide dependable protection and reliable quality. They are manufactured, tested and proven to perform, designed to deliver required cleanliness while optimizing dirt capacity. With lower pressure drop and greater efficiency, they ensure cleaner fluid, longer filter life and better protection for your equipment.

Performance

Today's industrial and mobile hydraulics require elements that deliver specified cleanliness under all circumstances. Donaldson high performance synthetic media filters provide dependable protection and reliable quality. They are manufactured, tested and proven to perform under the most severe conditions and are designed to deliver the quality and value that helps keep equipment running.

Choose Donaldson to keep your fleet running.
