FILTRATION SOLUTIONS

**Genuine PowerCore[®]
Air Filter Technology**

DON'T RISK IT

**WHEN IT COMES TO
FLEET MAINTENANCE**

**The best choice is genuine
PowerCore[®] air filters.**

When it comes to protecting your engine, **Why take chances?**

Smart fleet managers **demand proven performance** when it comes to **engine protection**.

Donaldson's revolutionary **PowerCore® air filters** have been meeting original equipment manufacturer specifications and **exceeding performance** requirements for **more than 20 years**.

In that time, PowerCore air filters have **logged billions** of **on-road miles** and off-road hours **protecting engines**, reducing downtime and driving cost savings for fleet operators around the globe.

Today, PowerCore air filters continue to **set new standards** with smaller, lighter air cleaners and airflow designs that **deliver superior initial restriction, efficiency and dust-holding capacity**.

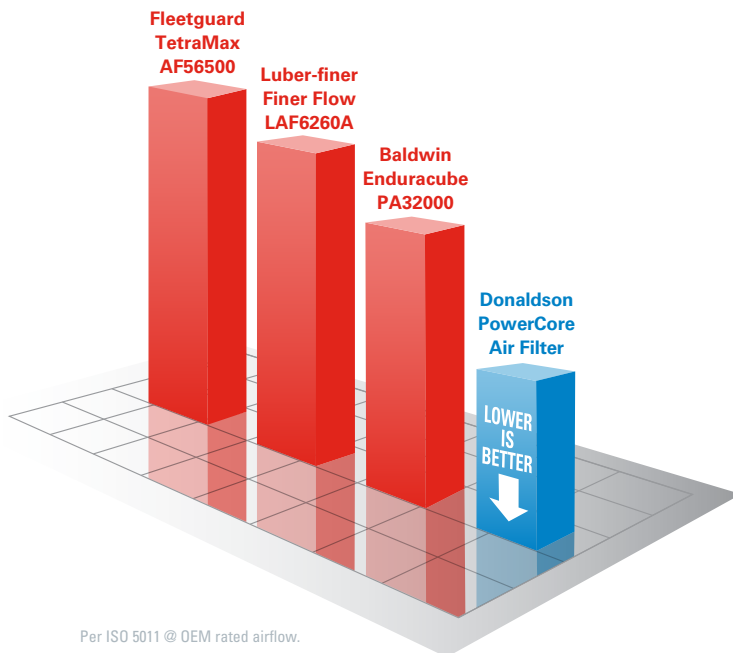

It's no wonder leading OEMs, fleet operators and equipment owners insist on genuine PowerCore air filters. They're the best choice.

Choosing a non-genuine air filter may seem like it's saving you money until you realize

It could cost you

\$200 per truck annually in additional fuel expense.

Genuine PowerCore® air filters deliver savings of up to \$200 per truck per year due to better initial restriction. A fleet of 600 trucks could save more than \$120,000 a year.*

Per ISO 5011 @ OEM rated airflow.

Better initial restriction

Protecting performance with

27% to 49%

lower initial restriction

Higher restriction negatively impacts engine performance, including reduced fuel economy.

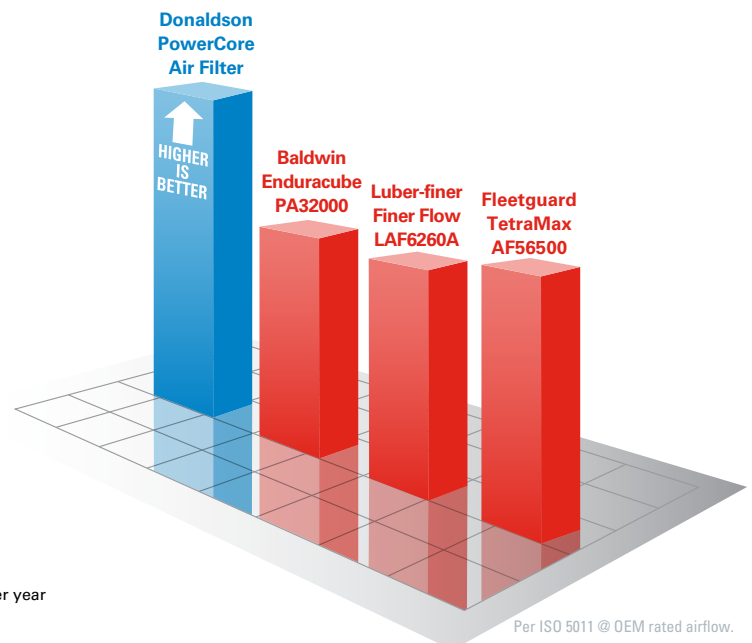

Better dust-loading

Extending filter life with

13% to 35%

more contaminant-loading capacity

Greater filter capacity means longer filter life, which means fewer filter changes and less money on maintenance.

Per ISO 5011 @ OEM rated airflow.

*Assumes \$3.99 USD per gallon (\$1.06 USD per liter) diesel fuel cost, 100k miles (160k km) per year under typical operating conditions with an annual change interval.

50 Million Reasons to Choose Genuine Donaldson PowerCore® Filters

Straight-through air flow offers proven protection

We've put more than **50 million PowerCore** air filters into equipment in hard-working, challenging environments.

PowerCore filters are trusted by maintenance managers and technicians for use in transportation, construction, and agricultural equipment. Wherever there is a job to be done, genuine Donaldson PowerCore filters are providing superior protection and performance, extended uptime, and the cost savings realized by less-frequent maintenance. **PowerCore filters are the best choice.**
