

CFS PREFILTER INSERT

Fully Synthetic Media

Picture is for representation only.
Final filter is purchased separately.

The CFS Prefilter, with integral bottom, extends the life of the primary filter by capturing larger particulate, such as seeds, leaves and large airborne fibers. It is made of a lofted, low-efficiency synthetic material, and is designed to be changed more often than primary filters. They are economical, disposable and easy to install.

KEY BENEFITS

- Single piece design featuring integrated bottom section
- Ideal for on-line change out as contaminants remain trapped in the prefilter
- Contaminants will not release into the final filter during the change out
- Periodic prefilter change outs can extend the life of the final filter and minimize operating restriction

PERFORMANCE DATA

cfm	w.g. (inches)	m ³ /hr	Pascal
450	0.06	765	14.9
800	0.09	1359	22.4
1200	0.13	2039	32.4
1600	0.16	2718	39.9
2000	0.23	3398	57.3
2400	0.29	4079	72.7
2800	0.36	4757	89.7

RELATED ITEMS

Description	Part Number
CFS prefilter only (without spring retainer strip)	P039584
Replacement prefilter spring retainer strip	P190883
CFS prefilter (with spring retainer strip)	P039684

SPECIFICATIONS

Filter Media 100% synthetic, lofted prefilter media

Media Area 7.9 ft² (0.74 m²)

Important Notice: Many factors beyond the control of Donaldson can affect the use and performance of Donaldson products in a particular application, including the conditions under which the product is used. Since these factors are uniquely within the user's knowledge and control, it is essential the user evaluate the products to determine whether the product is fit for the particular purpose and suitable for the user's application. All products, product specifications, availability and data are subject to change without notice, and may vary by region or country.
